

# Malik Okonkwo

Frontend Developer (Contract) | Warehouse Shift Lead

malik.okonkwo@email.example • (404) 555-0123

## PROFESSIONAL SUMMARY

---

Junior frontend developer, self-taught over two years, with a contract role building React interfaces for a small logistics startup. Writes typed components in TypeScript, tests them with React Testing Library and checks every screen with a keyboard and VoiceOver. Former warehouse lead who understands the dispatch tools he now builds.

## EXPERIENCE & PROJECTS

---

**Peachline Freight** · Atlanta, GA

**Feb 2025 — Present**

*Frontend Developer (Contract)*

- Built the driver check-in screen in React and TypeScript from a Figma file, replacing a paper sign-in sheet at two loading docks.
- Converted a cluttered dispatch table into sortable, filterable columns with sticky headers, so dispatchers find a truck without scrolling through every row.
- Added visible focus states, labelled form controls and live region announcements after testing the app with VoiceOver and keyboard only.
- Wrote component tests with React Testing Library for the check-in flow and set them to run on every pull request in GitHub Actions.

**Southern Crescent Distribution** · Atlanta, GA

**May 2020 — Jan 2025**

*Warehouse Shift Lead*

- Supervised a night crew of 14 and reported recurring problems with the scanning software, which first led to learning HTML, CSS and JavaScript.
- Created a shared spreadsheet dashboard for dock assignments that the day shift adopted, cutting handover confusion between crews.

### **Transit arrival board (React, TypeScript, open source)**

- Built a live bus arrival board from a public transit feed with polling, skeleton loaders, offline messaging and a dark mode that respects system settings.

## EDUCATION

---

**Associate of Applied Science, Computer Programming**

**2024**

*Chattahoochee Valley Technical College*

## SKILLS

---

**Technical:** TypeScript, React, HTML and semantic markup, CSS Grid and Flexbox, Tailwind CSS, React Testing Library, Vite, Accessibility (WCAG 2.2), REST APIs, Git and GitHub, Figma, Vercel

**Certifications:** Meta Front-End Developer Professional Certificate
