

Marisol Echeverría-Quinn

Lead Full Stack Developer | Senior Software Developer | Web Application Developer

marisol.echeverriaquinn@email.example • (215) 555-0185

PROFESSIONAL SUMMARY

Lead full stack developer with 13 years of experience across Rails, React and cloud infrastructure. Leads a team of six building donor, volunteer and grants software for a nonprofit technology organization. Sets technical direction, keeps the system simple enough for a small team to operate, and still ships features hands-on every sprint.

PROFESSIONAL EXPERIENCE

Lead Full Stack Developer

Mar 2019 — Present

Commonwealth Giving Lab · Philadelphia, PA

- Lead a team of six building the donation platform used by partner charities, owning architecture across Rails, React, PostgreSQL and AWS.
- Rebuilt recurring giving with tokenized card storage through the payment processor, shrinking PCI scope and cutting failed monthly charges through smarter retry timing.
- Chose to consolidate three small services back into the Rails monolith, reducing deploy complexity and on-call load for a team without dedicated operations staff.
- Hired four developers and introduced a written onboarding path, so new hires ship a production change in their first week.

Senior Software Developer

Jan 2015 — Feb 2019

Schuylkill Civic Software · Philadelphia, PA

- Built a permit application portal for municipal clients in Rails and React, replacing paper forms with online submissions, fee payment and status tracking.
- Made the portal meet WCAG 2.0 AA and Section 508 requirements for government contracts, testing with screen readers and residents who use assistive technology.
- Introduced background job monitoring and database query reviews that ended a pattern of slow pages during permit deadline weeks.

Web Application Developer

Jun 2012 — Dec 2014

Old City Interactive · Philadelphia, PA

- Developed custom PHP and jQuery web applications for regional universities and museums, from database design to deployment on managed servers.
- Built an event registration system with waitlists and email confirmations that a museum client used for several years of member programs.

EDUCATION

BS, Computer Science — Delaware Valley Institute of Technology

2012

SKILLS

Technical: Ruby on Rails, React, TypeScript, PostgreSQL, Sidekiq, Hotwire, AWS, Terraform, Accessibility (WCAG), Payments and PCI scope, Technical roadmapping, Hiring and mentoring
