

Samuel Lindqvist

Mobile Engineering Lead | Senior iOS Engineer | Mobile Developer

samuel.lindqvist@email.example • (312) 555-0124

PROFESSIONAL SUMMARY

Senior mobile engineering lead with 11 years shipping iOS, Android and React Native apps for retail and healthcare. Leads a cross-platform team of eight, owns the release train and app performance budgets, and decides when a feature needs native code. Has taken two apps through major rewrites without losing ratings or interrupting weekly releases.

PROFESSIONAL EXPERIENCE

Mobile Engineering Lead

Apr 2021 — Present

Lakeshore Pharmacy Group · Chicago, IL

- Lead eight engineers building the pharmacy app in React Native and TypeScript, used for prescription refills, appointment booking and digital insurance cards.
- Moved the app to the React Native New Architecture and Hermes, cutting cold start on mid-range Android phones from 4.1 seconds to 1.9.
- Set up a weekly release train with Fastlane, EAS builds and Detox end-to-end tests, replacing ad hoc releases that often slipped by weeks.
- Wrote native Swift and Kotlin modules for barcode scanning and secure document storage where the JavaScript layer could not meet privacy requirements.

Senior iOS Engineer

Feb 2017 — Mar 2021

Northshore Outfitters Digital · Evanston, IL

- Rebuilt the shopping app checkout in Swift with Apple Pay, lowering cart abandonment in a two-month split test across new and returning customers.
- Introduced a modular UIKit architecture and design system, letting three squads ship features in parallel without colliding in shared screens.
- Mentored five junior iOS developers and wrote the team's code review guidelines, including accessibility and localization checks.

Mobile Developer

Jul 2014 — Jan 2017

Midway Interactive Studio · Chicago, IL

- Built native iOS and Android apps for agency clients in Objective-C and Java, including a museum guide with indoor beacon positioning.
- Set up the studio's first continuous integration for mobile builds, ending late-night manual archive and upload sessions before client deadlines.

EDUCATION

BS, Computer Science — Prairie Lakes University

2014

SKILLS

Technical: React Native, TypeScript, Swift, Kotlin, New Architecture (Fabric, TurboModules), Expo EAS, GraphQL, Detox, Fastlane, Sentry, Release management, Mobile performance, Team leadership, HIPAA-aware app design
