

Jordan Kealoha

iOS Developer Intern | Student Developer

jordan.kealoha@email.example • (503) 555-0133

PROFESSIONAL SUMMARY

Junior iOS developer with a published SwiftUI app, a summer internship on a ride-share companion app and a computer science degree. Builds screens in SwiftUI and UIKit, writes XCTest suites before refactors and reads crash reports before feature requests. Looking for a first full-time role on a team that ships to the App Store on a regular cadence.

EXPERIENCE & PROJECTS

Rosecity Mobility · Portland, OR

Jun 2025 — Sep 2025

iOS Developer Intern

- Built the trip receipt and tipping screens in SwiftUI for a rider app, shipping them behind a feature flag across two App Store releases.
- Tracked down a memory leak in the map screen with Instruments, which had been crashing older iPhones during long trips.
- Wrote snapshot and unit tests for the payment summary view so the team could safely replace a legacy networking layer the following quarter.

Campus Apps Lab, Willamette Ridge University · Salem, OR

Sep 2023 — May 2025

Student Developer

- Maintained the university's dining and shuttle app for iOS, triaging bug reports from students and pushing fixes through TestFlight before each term.
- Added VoiceOver labels and Dynamic Type support across twelve screens after an accessibility review by the disability services office.

TrailNote hiking journal (published on the App Store)

- Designed and shipped a SwiftUI and SwiftData app with offline maps and photo logs, holding a 4.7 rating from about 300 reviews.
- Handled App Store review, privacy labels and two rejected submissions, fixing location permission wording before the third attempt passed.

EDUCATION

BS, Computer Science

2025

Willamette Ridge University
