PROFESSIONAL SUMMARY

Primary health care nurse practitioner registered in Ontario's extended class, with five years in a nurse practitioner-led clinic and an urgent care centre. Carries a panel of adult and older adult patients, manages complex chronic conditions with the interprofessional team and leads the clinic's cervical screening and diabetes programs.

PROFESSIONAL EXPERIENCE

Nurse Practitioner – Primary Health Care

Sep 2022 — Present

Escarpment Nurse Practitioner-Led Clinic · Hamilton, ON

- Provide comprehensive primary care to a panel of about 900 rostered adults and older adults, with home visits for patients unable to attend the clinic.
- Lead the diabetes program with a dietitian and pharmacist, running group education sessions and structured follow-up visits for newly diagnosed patients.
- Organized a cervical screening recall using EMR searches and reminder letters, bringing overdue patients back into routine screening.
- Supervise nurse practitioner students from two university programs during their primary care placements.

Nurse Practitioner – Urgent Care

Jul 2021 — Aug 2022

Bayfront Urgent Care Centre · Burlington, ON

- Assessed and treated walk-in patients with minor injuries and acute illness, including suturing, splinting, and ordering and reading X-rays.
- Worked with emergency physicians on shared protocols for chest pain and pediatric fever, escalating cases that needed emergency department care.
- Documented visits in the centre's EMR and sent structured summaries to each patient's family physician or nurse practitioner.
