Doctor of Pharmacy (PharmD)
North Saskatchewan University
2020

CERTIFICATIONS

· Clinical Pharmacist, Alberta College of Pharmacy

· Additional Prescribing Authorization (Alberta)

· Authorization to administer drugs by injection

· Standard First Aid and CPR

PROFESSIONAL SUMMARY

Community pharmacist and pharmacy licensee with six years in Alberta practice, holding additional prescribing authorization. Runs a busy independent pharmacy, built its prescribing and chronic disease clinic services and manages a team of eight. Strong in medication reviews, renewals and adaptations, and steady with the regulatory side of running a licensed pharmacy.

PROFESSIONAL EXPERIENCE

Pharmacist and Pharmacy Licensee

Mar 2023 — Present

Whitemud Valley Pharmacy · Edmonton, AB

- Manage an independent community pharmacy with eight staff, responsible for licensing, narcotic counts, audits and the operational standards set by the provincial college.
- Built a scheduled care plan service for patients with diabetes and hypertension, booking follow-up appointments instead of relying on walk-in counseling.
- Prescribe adaptations, renewals and initial therapy within additional prescribing authorization, documenting decisions and notifying each patient's physician.
- Trained two pharmacy technicians to take on technical checks, freeing pharmacist time for injections, care plans and patient assessments.

Staff Pharmacist

Jun 2020 — Feb 2023

Prairie Crossing Drug Mart · St. Albert, AB

- Dispensed and checked prescriptions in a busy community pharmacy, including methadone and buprenorphine dosing for opioid agonist therapy patients.
- Gave influenza and travel vaccines during seasonal clinics, organizing booking blocks so walk-in prescriptions were not delayed.
- Reviewed blister-pack orders for two group homes each week, catching changes in medication orders before packs went out.
